FACT AND DISCLOSURE SHEET

The purpose of this fact sheet is to explain Dr Cabena's qualifications, methods of diagnosis and management, and some of her clinic's policies and procedures so as to assist with your decision to become a client of the IV nutrient clinic.

1. Qualifications. Dr Rashmi Cabena has been practicing medicine for over 30 years and has extensive experience in treating patients with chronic illnesses. She is friendly, easy going, always willing to help. She takes a patient centered integrative approach to treating her patients, maximising their chances of full recovery and well-being. She believes in finding and eliminating the source whilst treating her patients as naturally as possible. With great passion for furthering her knowledge and with pure dedication to help her patients, she is constantly attending courses, conferences, educational programmes and acquiring new certifications in order to keep up with the latest.

2. Fees. The cost of the injectable nutrients themselves are as per the fees outlined on p3. These are subject to change without notice. The cost of injectable nutrients is generally not covered in whole or part by Medicare or private health insurance, a disappointing situation. Prior to the first administration, usually Dr Cabena will require a 20 min consultation, to attain a medical history and examination, which is considered standard safe medical practice. This will usually be billed at \$150 with a Medicare rebate of \$71.70.

3. Treatment protocols. Some of the protocols Dr Cabena employs in her injectable nutrient clinic include:

- Myer's cocktail
- High-dose intravenous vitamin C
- Anti-oxidant cocktail

I have the following questions about Dr Cabena and her IV nutrient clinic:

4. Acknowledgement by potential client. I have read the above fact and disclosure form and understand the nature of Dr Cabena's practice as described in Points 1 – 3 listed above.

I request the following treatment procedures to be performed on me:

Injectable nutrient therapy
